SUMMARY

Computer Science student at Weber State University with hands-on experience in technical support, systems administration, and software development. Experienced supporting Microsoft 365 accounts, troubleshooting audiovisual and computer systems, developing internal business applications, and working with SQL databases. Strong problem-solving skills with a customer-focused approach and a solid foundation in Windows, Linux, networking concepts, and modern development tools. Seeking to apply both technical support and software troubleshooting skills in an app support role while continuing to expand technical education.
